# Lubricants & Grease for use in Commercial Vehicles

## Shell **RIMULA** - Engine Oils

Truck and heavy-duty diesel engine oils are designed to provide outstanding wear protection and reduced viscosity for improved fuel economy.

Shell Rimula synthetic oils are available with Dynamic Protection Plus technology, which combines Shell Pureplus technology with Adaptive Additive Technologies, for increased benefits and durability

### **OEM Approvals:**

MAN, Renault Trucks, Volvo, Caterpillar, Cummins & Mack

## Shell **Spirax** - Axle, Gear & Transmission Oils

Providing protection for your transmission components, so they can go on working efficiently. Benefits have been tested through extensive laboratory tests and over 20 million kilometres of field trials

### **OEM Approvals:**

MAN, Volvo, Scania, Ford Mercon, General Motors Dexron, Mercedes Benz

## Shell **Gadus** - Grease

High technology greases designed to give optimum performance for grease lubrication in industrial bearings

# Improving Fuel Economy & Protecting Engines

## Keeping your fleet on the road:

Using the correct Lubricant can help to reduce maintenance costs, reduce operational costs and increase the service life and productivity of your commercial vehicles

Silgo Lubricants can help you select an oil that will improve fuel economy and protect the engines of your commercial vehicles in all weather conditions. Protecting against acids forming that corrode parts of your engine, and excessive piston deposits that can cause sticking, abrasion and cylinder wear.

The right oil will keep your trucks on the road for longer and has the potential to save you money

## Lubricants designed to reduce ownership costs:

### Lower maintenance costs

By offering value through exceptional oil life and protection, meaning oil-drain intervals and component life can be extended

### Cut unplanned downtime

Exceptional wear, pitting, bearing-failure and corrosion protection, helping to protect against unplanned downtime

### Greater fuel efficiency

Higher mechanical efficiency can help to deliver fuel efficiencies and savings

# First Class Technical & Product Support

## Technical Support and Advice:

Our experienced lubricants specialists are fully trained to provide in-depth technical and product support. Helping you to maximise the benefits from your lubricants, including product recommendations, application guidance as well as advice on lubricant best practices.

## Fluid Management Service:

We can provide lubricant and coolant management services to maximise the productivity and cost benefits, including:

- **Site Surveys:** Reducing complexity and improving control.
- **Safety:** Health and Environment advice and support.
- **Technical support:** ensuring that correct fluid technology is adopted.

## Access to Shell Lubricants Industry leading technical support:

Shell  
LubeMatch

Shell LubeMatch is an online tool which can offer advice on the best product to meet your needs.

Shell  
LubeAdvisor

The Shell LubeAdvisor service aims to help customers improve their lubricant applications and maintenance practice by providing engineering, technical and application knowledge

# Lubricants - Small Cost, Big Impact

Axel Oils

Gear Oils

Transmission Oils

Engine Oils

Grease

**Effective lubrication can help companies reduce the total cost of ownership (TCO) through lower maintenance costs, reduced unplanned downtime, and productivity improvements.**

This study commissioned by Shell Lubricants and conducted by independent research firm Edelman Intelligence, polled 493 decision-makers in the manufacturing industry in eight countries (Brazil, Canada, China, Germany, India, Russia, the UK and the US) from November to December 2015

1. Total Cost of Ownership (TCO) is defined by Shell Lubricants as the total amount spent on industrial equipment, including cost of acquisition and operation over its entire working life, including costs of lost production during equipment downtime
2. Potential impact calculated based on Shell Lubricants site surveys with customers.
3. Recommended procedures are delivery and storage, oil change, oil dispensing systems, efficient grease lubrication systems, oil analysis and training employees in lubricant selection or management.
4. \$ figure based on converting local currency into equivalent \$ amount

- 6 in 10 companies are unclear how lubrication can influence unplanned downtime or equipment availability
- In reality lubricants can impact up to 30% of maintenance budget
- Only 1 in 4 have all the correct lubrication management procedures in place
- 20% believe unplanned equipment shutdowns due to their incorrect lubricant selection and/or management have cost their business \$250,000 or more.

# A Truly National Lubricants Business

## About Silgo Lubricants:

Silgo Lubricants alongside Gleaner Oils specialise in supplying quality lubricants and grease, providing a truly national lubricants service. Silgo Lubricants have over 30 years' experience as a dedicated lubricants specialist. Gleaner Oils has over 60 years' industry experience as a fuel distribution company supplying oil, lubricants and grease.

Together we offer a comprehensive range of products, blended to the highest standard of excellence. We can provide lubricants from some of the world's largest manufacturers of lubricants and grease. All the while backed up by our first class technical support, excellent delivery and customer service.

## Reliable Delivery Across the UK:

To ensure your business operates smoothly, we provide a reliable delivery service across the UK. Our national network ensures we are able to fulfil orders across the UK. Through our depots, warehouses and distributors across the country we have the infrastructure in place to support your business and provide a consistent delivery service.
